## D2FC

## Ultra Subminiature Basic Switch

## Ultra Subminiature Basic Switches for operations requiring high reliability with a long life and a clear click feeling

- A long life achieved using a stable spring structure
- Ideal for applications such as mouse operations

```
Refer to "Precautions" on page 4.
```

## Model Number Legend

D2FC- $\qquad$
(1) (2)

| (1) Operating Force (OF) | (2) Durability |
| :--- | :--- |
| None: $1.0 \pm 0.23 \mathrm{~N}$ | $-7: 5$ million times |
| F: $0.59 \pm 0.15 \mathrm{~N}$ | $-7 \mathrm{~N}(20 \mathrm{M}): 20$ million times |
|  | $-7 \mathrm{~N}(60 \mathrm{M}): 60$ million times |

## Contact Form

SPST-NO

## List of Models

| Operating Force (OF) | Durability, Mechanical/Electrical | Button color | Model | Minimum packing unit |
| :---: | :---: | :---: | :---: | :---: |
| 1.0 N | $5,000,000$ operations min. | WHITE | D2FC-7 |  |
| 10.59 N | $20,000,000$ operations min. | WHITE | D2FC-F-7N(20M) | 1,000 pcs. |
|  | $60,000,000$ operations min. | ORANGE | D2FC-F-7N(60M) |  |

## Contact Specifications

| Contact | Specification | Crossbar |
| :--- | :--- | :--- |
|  | Material | Silver |
|  | Gap (standard value) | 0.4 mm |
| Minimum applicable load (reference value)* | 5 VDC 1 mA |  |

* For the minimum applicable load, refer to Using Micro-loads under Precautions.

## Ratings

| Rated voltage | Resistive load |
| :---: | :---: |
| 6 VDC | 1 mA |

Note: The rating values apply under the following test conditions.
Ambient temperature: $20 \pm 15^{\circ} \mathrm{C}$
Ambient humidity: $65 \pm 20 \% \mathrm{RH}$
Operating frequency: 300 operations $/ 1 \mathrm{~min}$.

## Characteristics

|  |  | D2FC-7 | D3FC-F-7N(20M) | D2FC-F-7N(60M) |
| :---: | :---: | :---: | :---: | :---: |
| Operating speed |  | 1 mm to $500 \mathrm{~mm} / \mathrm{s}$ |  |  |
| Operatiing frequency | Mechanical/Electrical | 300 operations/1 min. max. |  |  |
| Insulation resistance |  | $100 \mathrm{M} \Omega \mathrm{min}$. (at 500 VDC ) |  |  |
| Contact resistance (initial value) |  | $100 \mathrm{~m} \Omega$ max. |  |  |
| Dielectric strength | Between terminals of same polarity | 600 VAC 50/60 Hz 1 min |  |  |
| Vibration resistance *1 | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ double amplitude |  |  |
| Shock resistance *1 | Destruction | $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{max}$. |  |  |
|  | Malfunction | $300 \mathrm{~m} / \mathrm{s}^{2} \mathrm{max}$. |  |  |
| Durability *2 | Mechanical/Electrical | 5,000,000 operations min. (at $300 \mathrm{ops} . / 1 \mathrm{~min}$.) | 20,000,000 operations min. (at $300 \mathrm{ops} . / 1 \mathrm{~min}$.) | 60,000,000 operations min. (at $300 \mathrm{ops} . / 1 \mathrm{~min}$.) |
| Degree of protection |  | Equivalent to IEC IP40 |  |  |
| Ambient operating tamperature |  | -25 to $+65^{\circ} \mathrm{C}$ (at 60\%RH Max.) (with no icing or condensation) |  |  |
| Ambient operation humidity |  | $85 \%$ RH max. (for +5 to $+35^{\circ} \mathrm{C}$ ) |  |  |
| Weight |  | Approx. 0.5 g |  |  |

Note: The data given above are initial values.
*1. The values are at Free Position and Total Travel Position values.
Close or open circuit of the contact is 1 ms max.
*2. For testing conditions, consult your OMRON sales representative.

Dimensions (Unit: mm) I
Operating Characteristics

## D2FC-7

D2FC-F-7N(20M)
D2FC-F-7N(60M)
PCB pad terminals (straight type)

<PCB pad dimensions (reference)>

Recommended shape for proper stalk operation

Do not connect the dummy terminal to the circuit.

Operation characteristics

|  |  | D2FC-F-7N(20M) <br> D2FC-F-7N(60M) | D2FC-7 |
| :--- | :--- | :---: | :---: |
| Operating Force | OF | $0.59 \pm 0.15 \mathrm{~N}$ | $1.0 \pm 0.23 \mathrm{~N}$ |
| Releasing Force | RF | 0.24 N min. | 0.2 N min. |
| Movement up to Operation | PT | $0.3 \pm 0.2 \mathrm{~mm}$ | $0.3 \pm 0.2 \mathrm{~mm}$ |
| Overtravel | OT | 0.2 mm min. | 0.2 mm min. |
| Movement Differential | MD | 0.12 mm max. | 0.15 mm max. |
| Free Position | FP | 7.35 mm max. | 7.35 mm max. |
| Operating Position | OP | $6.9 \pm 0.2 \mathrm{~mm}$ | $6.9 \pm 0.3 \mathrm{~mm}$ |

Note: Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.

## Precautions

« Refer to General Information.

## Cautions

## Electrical Ratings

- Use the Switch within the rated voltage and current ranges, otherwise the Switch may have a shortened durability, radiate heat, or burn out. This particularly applies to the instantaneous voltages and currents when switching.

## Correct Use

## Soldering

- Before soldering the Switch on a multilayer PCB, test to confirm that soldering can be performed properly. Otherwise, the Switch may be deformed by the soldering heat on the pattern or lands of the multilayer PCB.
- When using an automatic solder bath, work is recommended to be carried out within five seconds at $260^{\circ} \mathrm{C}$. In addition, ensure that the liquid surface level of the solder and flux do not exceed the board.
- For manual soldering, ensure that the processing time is within roughly three seconds for a soldering iron with a tip temperature of $350^{\circ} \mathrm{C}$ or less. Be sure not to apply external force for around one minute after soldering. In addition, feed the solder away from the switch case and ensure that the solder and flux do not flow to the case side.

## Washing

- The Switch is not sealed, and cannot be washed. Doing so will cause the washing agent, together with flux or dust particles on the PCB, to enter the Switch, resulting in malfunction.

## Application Environment

- Do not use the Switch in locations that are subject to toxic gas, silicon, excessive dust, excessive dirt, high temperatures, high humidity, sudden temperature changes, water splashes, or oil splashes.
Otherwise, damage resulted by faulty contact of the Switch contacts, corrosion, or other causes, or other functional faults may occur.

## Using Micro-loads

- Loads in which inrushes or surges occur may cause a drop in durability, so insert a contact protection circuit as necessary. The minimum applicable load is the M-level reference value. This indicates the failure level at a confidence level of $60 \%(\lambda 60)$. (JIS C5003)
- $\lambda 60=1.0 \times 10-6 /$ times indicates that failures are assumed to occur less than $1 / 1,000,000$ times at a confidence level of $60 \%$.
