Ultra Subminiature Basic Switch

## Ultra Subminiature Basic <br> Switch with plenty of terminal variations

- Incorporating a snapping mechanism made with two highly precise split springs that ensures long durability.
- Using insertion molded terminals that prevents flux penetration.
- In addition to self-clinching PCB, left-angled, right-angled terminals,
2 types of soldering terminals are available.

## RoHS Compliant

## Model Number Legend

D2F-1 234

1. Ratings
2. Terminals

None: 125 VAC 3A
None: PCB terminals (Straight)
$-T$ : Self-clinching PCB terminals
-A : PCB terminals (Right-angled)
-A1: PCB terminals (Left-angled)
2. Maximum Operating Force (OF)
-D3: Solder terminals
-D : Compact solder terminals
None: $1.47 \mathrm{~N}\{150 \mathrm{gf}\}$
F : $0.74 \mathrm{~N}\{75 \mathrm{gf}\}$
Note. The given values are for pin plunger models only.
3. Actuator

None: Pin plunger
L : Hinge lever
L2 : Hinge Roller Lever
L3 : Simulated roller lever (R1.3)
L30: Simulated roller lever (R2.5)

## List of Models

## Contact Form

-SPDT

## Contact Specifications

| Item $\quad$ Model |  | D2F models | D2F-01 models |
| :--- | :--- | :---: | :---: |
| Contact | Specifications | Crossbar |  |
|  | Material | Silver alloy | Gold alloy |
|  | Gap (standard value) | 0.25 mm |  |
| Minimum applicable load (see note) * |  | 100 mA at 5 VDC | 1 mA at 5 VDC |

* Please refer to "Using Micro Loads" in "Precautions" for more information on the minimum applicable load.

## Ratings

| Model <br> Maximum Operating <br> Force (OF) | D2F models |  | D2F-01 models |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1.47N (General-purpose) | 0.74N (Low Operating Force) | 1.47N (General-purpose) | 0.74N (Low Operating Force) |
|  | Resistive load |  |  |  |
| 125 VAC | 3 A | 1 A | - |  |
| 30 VDC | 2 A | 0.5 A | 0.1 A |  |

Note. The above rating values apply under the following test conditions.
(1) Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
(2) Ambient humidity: $65 \pm 5 \%$
(3) Operating frequency: 30 operations $/$ min

## Approved Safety Standard

The items shown in the "List of Models" above are not standard approved models.
Consult your OMRON sales representative for specific models with standard approvals.
UL (UL1054) /CSA (CSA C22.2 No.55)

| Rated voltage $\quad$ Model | D2F (General-purpose) | D2F (Low operating force) | D2F-01 |
| :---: | :---: | :---: | :---: |
| 125 VAC | 3 A | 1 A | - |
| 30 VDC | 2 A | 0.5 A | 0.1 A |

## Characteristics

| Item | Model | D2F-01 models | D2F-F models | D2F models |  |
| :--- | :--- | ---: | :---: | :---: | :---: |
| Permissible operating speed | $\begin{array}{r}\text { Pin plunger models: } 1 \mathrm{~mm} \text { to } 500 \mathrm{~mm} / \mathrm{s}, \\ \text { Lever models: } 5 \mathrm{~mm} \text { to } 500 \mathrm{~mm} / \mathrm{s}\end{array}$ |  |  |  |  |
| $\begin{array}{l}\text { Permissible } \\ \text { operating } \\ \text { frequency }\end{array}$ | Mechanical | Electrical | $\begin{array}{r}\text { Pin plunger models: } 200 \text { operations } / \mathrm{min}, \\ \text { Lever models: } 100 \text { operations } / \mathrm{min}\end{array}$ |  |  |
| 30 operations $/ \mathrm{min}$ |  |  |  |  |  |$]$

| Item Model |  | D2F-01 models | D2F-F models | D2F models |
| :---: | :---: | :---: | :---: | :---: |
| Dielectric strength | Between terminals of the same polarity | 600 VAC $50 / 60 \mathrm{~Hz}$ for 1 min |  |  |
|  | Between current-carrying metal parts and ground | 1,500 VAC $50 / 60 \mathrm{~Hz}$ for 1 min |  |  |
|  | Between each terminal and non-current-carrying metal parts | 1,500 VAC $50 / 60 \mathrm{~Hz}$ for 1 min |  |  |
| Vibration resistance * 1 | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5-\mathrm{mm}$ double amplitude |  |  |
| Shock resistance | Durability | 1,000 m/s ${ }^{2}$ \{approx. 100G\} max. |  |  |
|  | Malfunction * 1 | $300 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 30G\} max. |  |  |
| Durability * 2 | Mechanical | 1,000,000 operations min. (60 operations/min) |  |  |
|  | Electrical | 100,000 operations min. (30 operations/min) | $\begin{aligned} & 30,000 \text { on } \\ & \text { (30 ope } \end{aligned}$ | ions min. ns/min) |
| Degree of protection |  | IEC IP40 |  |  |
| Ambient operating temperature |  | $-25^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ (at ambient humidity $60 \%$ max.) (with no icing or condensation) |  |  |
| Ambient operating humidity |  | $85 \%$ max. (for $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ ) |  |  |
| Weight |  | Approx. 0.5 g (pin plunger models) |  |  |

Note. The data given above are initial values.
*1. The values are at Free Position and Total Travel Position values for pin plunger, and Total Travel Position value for lever. Close or open circuit of the contact is 1 ms max.
*2. For testing conditions, consult your OMRON sales representative.

## Terminals/Appearances (Unit: mm)

Ultra Subminiature Basic Switch

## Dimensions (Unit: mm) /Operating Characteristics

The following illustrations and drawings are for D2F models with PCB terminals (straight). Self-clinching, solder, compact solder, and right-angled, left angled terminals are omitted from the following drawings. Refer to the previous page for these terminals.
When ordering, replace $\square$ with the code for the terminal that you need. See the "List of Models" for available combinations of models.

Note 2. The operating characteristics are for operation in the A direction ( $\downarrow$ ).

## Precautions

太Please refer to "Basic Switches Common Precautions" for correct use.
Cautions

## -Soldering

- Terminal connection

When soldering, make sure that the temperature of the soldering iron tip is not higher than $300^{\circ} \mathrm{C}$, and complete the soldering within 3 seconds. Do not apply any external force for 1 minute after soldering. Soldering at an excessively high temperature or soldering for more than 3 seconds may deteriorate the characteristics of the Switch.

- Connecting to PCB terminal Boards

When using automatic soldering baths, we recommend soldering at $260^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}$ within 5 seconds. Make sure that the liquid surface of the solder does not flow over the edge of the board.
When soldering terminals manually, perform soldering within 3 seconds at iron tip temperature not higher than $350^{\circ} \mathrm{C}$. Do not apply any external force for at least 1 minute after soldering.
When applying solder, keep the solder away from the case of the Switch and do not allow solder or flux to flow into the case.

| Correct Use |
| :--- |
| OMounting |

Use M2 mounting screws with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.08 to $0.1 \mathrm{~N} \cdot \mathrm{~m}\{0.8$ to $1 \mathrm{kgf} \cdot \mathrm{cm}\}$.

## -Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact. Use models that operate in the following range. However, even when using micro load models within the following operating range, if inrush current occurs when the contact is opened or closed, it may increase the contact wear and so decrease durability. Therefore, insert a contact protection circuit where necessary. The minimum applicable load is the N -level reference value. This value indicates the malfunction reference level for the reliability level of $60 \%\left(\lambda_{60}\right)$.
(JIS C5003)
The equation, $\lambda_{60}=0.5 \times 10^{-6} /$ operation, indicates that the estimated malfunction rate is less than $\frac{1}{2,000,000}$ operations with a reliability level of $60 \%$.
