Contact specification

F 66 - Electrical life (AC) v contact current
250 V (normally open contact)

F 66 - Electrical life (AC) v contact current
440 V (normally open contact)

H 66 - Maximum DC1 breaking capacity

- When switching a resistive load (DC1) having voltage and current values under the curve, an electrical life of $\geq 100 \cdot 10^3$ can be expected.
- In the case of DC13 loads, the connection of a diode in parallel with the load will permit a similar electrical life as for a DC1 load. Note: the release time for the load will be increased.
