Features

5~24V power supply voltage

Tracking device status and timely remote control through APP

Setting max 8 single or repeat timing tasks each device

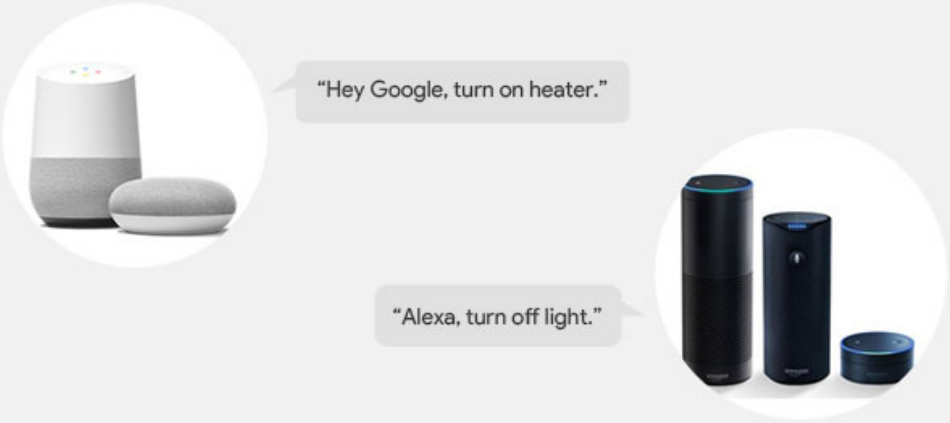

Fast configure SSID and password through APP

Numerous WiFi smart switches one smart phone

Automatic connect to server, register and update status info

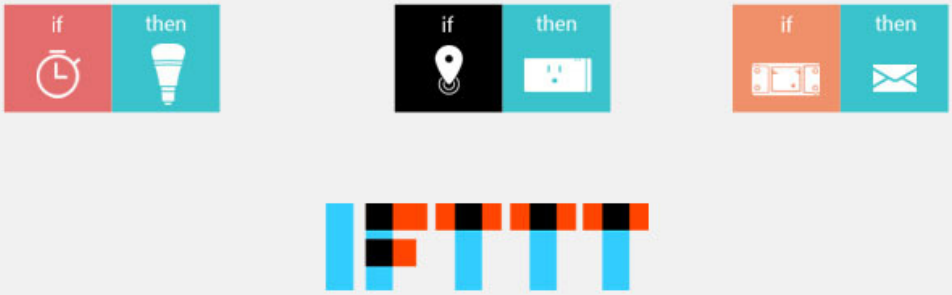

Reserve GIPO to support secondary development

Voice Control with Amazon Alexa and Google Assistant

Works With IFTTT

IFTTT helps your devices and apps work together in new ways

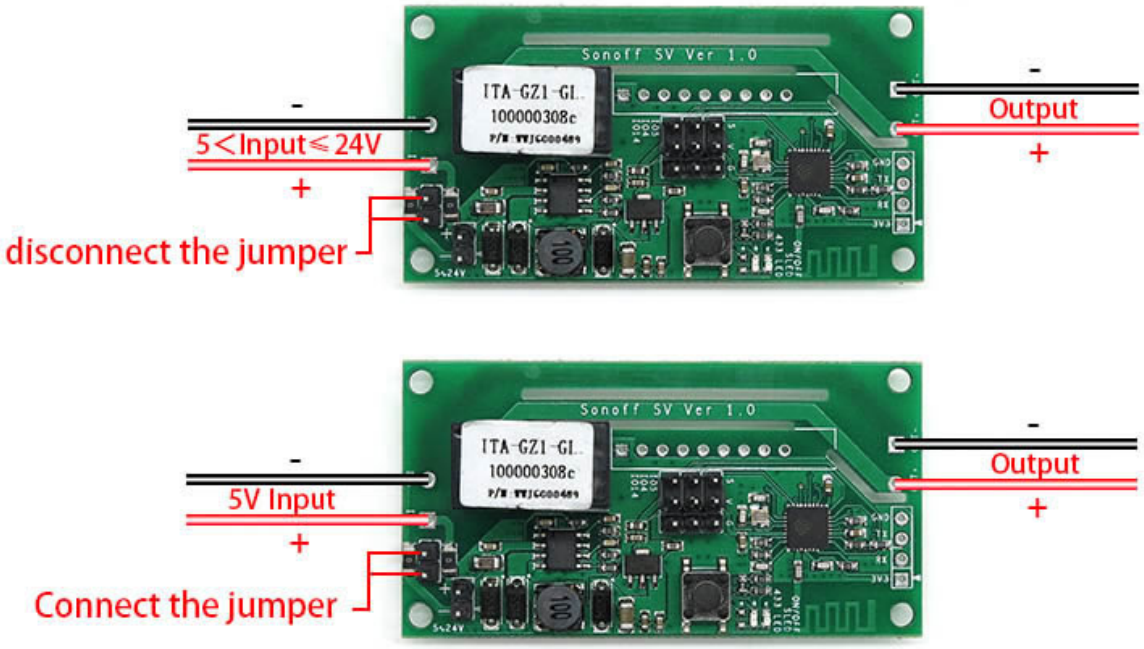

Strong core

Tensilica L106

ultra–low power consumption 32–bit micro–MCU, dominant frequency support 80 MHz and 160 MHz, support RTOS

Default mode:
WIFI circuit and relay circuit adopt the same power supply

Isolated Mode:
WIFI circuit and relay circuit can be isolated
